SUMMARY OF QUALIFICATIONS

- Foundational experience with Python and PyTorch through projects in LoRA implementation and large language model fine-tuning.
- Experience using Claude Code to review AI-generated educational labels and check data quality across 248 annotations and 26 concepts.
- Built a minimal LoRA layer in PyTorch and learned how to freeze model weights, train adapter parameters, and merge the adapter into the base layer.
- Interested in software development, machine learning, and using AI tools to solve technical problems.

TECHNICAL SKILLS

- **Languages:** Python
- **AI/ML:** PyTorch, LoRA, parameter-efficient fine-tuning, transformer fundamentals, LLM inference
- **Data:** JSON, data preparation, data validation, annotation review
- **Tools:** GitHub, Claude Code, LM Studio, PyCharm, Conda

RELEVANT EXPERIENCE

AI Education Data Verification Intern

August 2026 - September
2026

[Organization Name], Remote

- Used a Claude Code-based workflow to identify 248 annotations across 26 educational concepts for targeted manual quality review.
- Evaluated each flagged annotation against the corresponding knowledge concept, identifying 6 inaccurate labels and documenting proposed corrections.
- Produced a structured Word revision report; all 6 proposed annotation changes were accepted and incorporated into the dataset revision.

PROJECTS

LoRA Implementation and LLM Fine-Tuning

February 2026 - Present

Python, PyTorch, Qwen 3.5-4B, LM Studio

- Implemented a minimal LoRA layer in PyTorch by freezing the base weights and training two smaller low-rank matrices.
- Checked that the base weights stayed unchanged during training and compared trainable parameters between full fine-tuning and LoRA.
- Processed subtitle files into JSON, manually checked the training data, managed checkpoints, and ran the model locally in LM Studio.
- Replaced an unreliable OCR method with script-based subtitle extraction to create more consistent training data.

EDUCATION

Bachelor of Applied Science in [Electrical Engineering / Computer Engineering]

September 2026 - Present

University of Waterloo, Waterloo, ON
